Ms. Rebecca, Ms. Linyan, Mrs. Roaa

Greetings Family, I hope you are all safe during this time! Continue to encourage your child to wash their hands frequently. We seem to finally be enjoying some warm weather. Unfortunately, we have to stay home to keep safe. But don’t worry! There are so many activities to do indoors and still enjoy. One thing parent can do is point out all these wondrous miracles we can see in our everyday life. You can help expand their language, communication skills and help them to be eager learners.

Reading Beyond the Classroom

The month of April we are learning about Spring. Now that the warm weather is here and more rain, Children can learn about the flowers growing in on the ground and on trees! Here are some activities you can do with your children:

- Read books about flowers, gardens and planting. If you do not have any books on such, you can find a story on you tube for children to watch and listen.
- Look around the house and find some Gardening magazines

Teach them to write with methods that go beyond pencil and paper. Get messy!

- Write out some spring words for the children to see and learn to write, ex, “Spring, Rain, Flower, Garden, April.”

Math at home

Math is an easy subject to teach because it is all around us. Children don’t need worksheets for math, they should learn through play and hands on. Let make math fun!

- This activity is called Colors and patterns. Children will practice identifying colors and creating patterns using simple materials that can easily be taken anywhere you go. Materials to use: Large popsicle sticks, Dot stickers, Markers, Pom Poms.

The children will color the dot stickers to match the color of the pom poms, then stick colored dots on the popsicle sticks to create simple patterns. The children will place the pom pom on top of the stickers to match the colors and create a pattern.

Art

You may be wondering how you can extend your Childs creative abilities at home.

- Have your child draw a flower. After reading to your child or explaining how flowers grow, have your child draw a nice flower. They can draw as many as they like. Encourage to draw a garden has plenty flowers.
