Greetings Family, welcome to week three! Thank you for the parents that were reaching out. I will continue to reach out to you as well!! I hope you are all safe during this time! Continue to encourage your child to wash their hands frequently.

**Reading Beyond the Classroom**

- Read *Bear Feels Sick*. Discuss ways to stay healthy (catch cough/sneeze in elbow, wash hands, eat healthy, exercise, drink water, exercise).

**Math at home**

Math is an easy subject to teach because it is all around us. Children don’t need worksheets for math, they should learn through play and hands on. Let make math fun!

- Find basic shapes around the home, such as rectangles in light switches, squares in window panes, and circles in clocks. Ask your child to explain how she/he differentiates each shape by their defining features. Ex, a triangle has three sides.

**Art**

You may be wondering how you can extend your Childs creative abilities at home.

Description: The parent/guardian will tape a long section of white paper onto a wall or easel board. The child will wear the Apron or old shirt so that they will not get messy. The parent/guardian will fill the spray bottle with different color paint. The child will have the opportunity to use the different bottles to spray onto the white paper on the easel or the wall. Parent will encourage child to overlap colors. Use open ended questions such as, “what colors are you using? “Tell me about what you are doing.” “Wow, how did you get this color?” “What did you do first?” “What can you do to keep the paint from dripping to the floor?”

**Materials needed:**

- Roll of white paper, Spray bottles (preferably bottles like window cleaner), Thin paint-water based paint of any kind, Masking tape, Apron or old shirt
