Hello classroom 1400 A! From Ms. Edna and Ms. Rebecca. We are both hoping everyone is continuing to stay healthy and safe. We also hope you are enjoying the wonderful weather we’ve been having. Don’t forget to check out the postings Ms. Edna and I post on ClassDojo, there are some fun activities you all can do.

Some activities this week you all can try are the following:

- **Physical activity:** Go for a walk around your neighborhood and look around to see if you can spot some flowers growing and see what they look like and while walking see if you spot the same type of flowers anywhere else and see if there are different types of flowers around your neighborhood.

- **Math activity:** Math: Planting flowers number line

- **Art Activity:** Making a Bunch of Grapes. This activity you will need a piece of white paper, toilet paper roll, purple and green paint. You will dip the toilet paper roll in purple paint and stamp it on white paper to make a bunch of circles to look like a bunch of grapes. Use green paint and a brush to make the leaves on top.

- **Reading:** Is a great activity to do together. There are books on gardens, flowers and vegetables. If you can’t a book about the items listed just grab a book from what the kids have at home and sit under a tree and read together. Here’s a link to a read aloud book [Olivia Grows a Garden](#)
